

Black Clover Academy

Free 30-day trading curriculum — 59 lessons, 6 modules. Course syllabus from the Clover Trading desk. clovertrading.io

Curriculum

Module	Length
Module 1 — Meet The Clovers Who the desk is, how we actually trade, and the daily routine behind every alert: pre-market prep, watchlist build, and the post-session review.	5 lessons
Module 2 — Legal Agreement Risk disclosures, what we are and are not, and the ground rules you agree to before you place a single trade. Short, plain English, non-negotiable.	5 lessons
Module 3 — Essential Knowledge For Beginners Order types, choosing a broker, tickers, float and volume, halts, the PDT rule, spreads and slippage. Everything nobody explains before throwing setups at you.	12 lessons
Module 4 — Stock Market & Beyond: Key Knowledge Market structure, support and resistance, trend and consolidation, catalysts and news, building a morning watchlist, position sizing math, stop placement, scaling out, and journaling every trade.	35 lessons
Module 5 — How To Access Our Free Discord Get into the free community room and watch the desk work the tape live while you study.	1 lesson
Module 6 — Write A Review Tell us what landed and what didn't so we can keep sharpening the curriculum.	1 lesson

Your 30 days, mapped

Days 1-7 — Foundations & the language

Meet the desk, sign the ground rules, then get the vocabulary: order types, brokers, tickers, halts, PDT, float and volume.

Days 8-14 — Market structure

Support, resistance, trend, consolidation and the levels that matter. Stop watching candles, start seeing where buyers and sellers fight.

Days 15-22 — Catalysts & the watchlist

Why a stock moves: news, earnings, dilution, sympathy plays. How the desk builds a morning watchlist in under 20 minutes.

Days 23-30 — Risk, entries and exits

Position sizing formulas, stop placement, scaling out, and the trade journal that turns losses into data.

What you walk away with

- A working vocabulary so you understand every word in a trading room.
- The ability to read a chart's structure instead of reacting to green and red candles.
- A position sizing formula so one bad trade can never end your account.
- A written pre-trade plan: entry trigger, stop, and target before you click buy.
- A 20-minute morning routine that produces a real watchlist.
- A trade journal template that turns losses into data.
- Free Discord access to watch the desk work in real time.
- Lifetime access to your progress, notes and bookmarks.
